The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Lusk 3571783.

Disclosed are electrical connection means 40, insulating means 34, sealing means including a sealing compound (column 3, third full paragraph) and outer diaphragm 22, and wiping means 23.

Claims 1-5, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Niekrasz et al 5899765.

Disclosed are electrical connection means 26, insulating means 28 of an elastomeric material, sealing means including a sealing compound (col. 4, lines 37-39) and outer diaphragm 42, and wiping means 30.

Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: neither Niekrasz et al nor Lusk discloses inner or outer semiconducting walls, and it would not have been obvious to modify either reference in this way in view of the rest of the prior art of record.

The other references cited on Form 892 disclose similar waterproof connectors.
